## EXPERIENCE

**INDEPENDENT PROJECT** — **Remote, India**

***Lead Full Stack Developer (Freelance)*** — Aug 2025 – Present

- Architect a centralized hosting management portal using Ruby on Rails 8 and Hotwire.
- Integrate external infrastructure APIs for authentication, 2FA, and domain management.
- Implement custom rate-limiting middleware to secure critical endpoints.
- Containerize the application with Docker and enforce CI-based testing standards.

**CRAYO TECH** — **Remote, India**

***Lead Full Stack Developer (Freelance)*** — Feb 2024 – Jul 2025

- Led development of a public participation platform enabling structured interaction between citizens and government officials.
- Designed and implemented authentication and feedback systems, in collaboration with cross-functional teams.
- Built and deployed the platform using Java 14 and JavaServer Faces on IBM WebSphere with an IBM DB2 backend.

**CARTA** — **Bangalore, India**

***Full Stack Developer*** — Oct 2022 – May 2023

- Developed backend services for an equity management platform using Ruby on Rails, enabling platform adoption and usage for new customers.
- Built and shipped frontend features in React using TypeScript to improve onboarding workflows and usability.
- Collaborated with customer-facing teams to gather requirements and enable rapid feature iteration.

**FORD MOTOR COMPANY** — **Dearborn, Michigan | Chennai, India**

***Full Stack Developer*** — Sep 2019 – Oct 2022

- Implemented a map-based routing application using Java and Spring Boot to optimize technician scheduling and reduce customer wait times.
- Developed a React-based frontend enabling users to visualize and manage optimal service routes.

**CAPITAL ONE** — **Washington, DC**

***Software Engineer*** — Feb 2019 – Aug 2019

- Built microservices using Java and Spring Boot and implemented CI/CD pipelines with Jenkins for AWS ECS deployments.
- Implemented secure inter-service communication using Amazon SQS FIFO queues.
- Developed integration and performance test automation using Cucumber and JMeter.

**AL MULLA GROUP** — **Shuwaikh, Kuwait**

***Software Engineer*** — Nov 2014 – Jul 2016

- Developed enterprise web applications supporting internal workflows across multiple business units.
- Automated manual processes using a rules-based system to increase team efficiency.

**COGNIZANT TECHNOLOGY SOLUTIONS** — **Chennai, India**

***Software Development Engineer in Test*** — May 2012 – Oct 2014

- Performed regression and progression testing of an internal web development tool across multiple release cycles.
- Created user manuals and video tutorials to support adoption and onboarding.

## EDUCATION

**THE GEORGE WASHINGTON UNIVERSITY** — **Washington, DC**

Master of Science, Information Systems Technology — May 2018

**VIT UNIVERSITY** — **Vellore, India**

Bachelor of Technology, Computer Science & Engineering — May 2012

## SKILLS

| | |
|---|---|
| **Languages and Frameworks** | Java, Ruby, JavaScript, TypeScript, Spring Boot, Hibernate, Ruby on Rails, React |
| **Testing and Quality** | JUnit, Mockito, Cucumber, Minitest, JMeter |
| **DevOps and Tooling** | Git, Docker, Jenkins, Maven, Gradle, CI/CD |
| **Cloud Platforms** | Heroku, Vercel, Render |
| **Databases** | PostgreSQL, MySQL, Oracle, SQL Server |
