## CAREER SUMMARY

Versatile technologist with 9+ years of full stack development experience delivering digital transformation for fintech, automotive and public sector clients, including onsite client-facing roles in the USA, and an MBA in progress. Specializing in platform delivery, stakeholder management, cross-functional collaboration and strategic execution; targeting tech consulting and project leadership roles.

## PROFESSIONAL EXPERIENCE — 9 Years 9 Months

**Senior Developer, Kite Technology Solutions, Remote** — **Aug 2025 to Mar 2026**

- Owned end-to-end delivery and architecture of a hosting management platform, from concept to production.
- Defined the integration strategy for account security and domain management across third-party infrastructure providers.
- Established engineering standards that cut release friction and improved deployment reliability.

**Senior Java Developer, Crayo Tech, Remote** — **Feb 2024 to Jul 2025**

- Led end-to-end delivery of a citizen engagement platform enabling a government agency to gather structured public input.
- Translated government stakeholder requirements into a secure feedback and access system for public users.
- Owned architecture and deployment of the platform on enterprise infrastructure to meet government reliability standards.

**Full Stack Developer, Carta, Bangalore, India** — **Oct 2022 to May 2023**

- Built backend services for an equity management platform that supported onboarding of new customers.
- Shipped frontend improvements that streamlined customer onboarding and usability.
- Partnered with customer-facing teams to translate client feedback into rapid feature iterations.

**Full Stack Developer, Ford Motor Company / Altimetrik, Dearborn, USA / Chennai, India** — **Sep 2019 to Oct 2022**

- Built a routing application that optimized technician scheduling and cut customer wait times.
- Delivered a frontend that let dispatchers visualize and manage optimal service routes in real time.
- Mentored junior developers through code reviews and technical guidance.

**Software Engineer, Capital One / Hyperion Technologies, McLean, USA** — **Feb 2019 to Aug 2019**

- Built microservices and CI/CD pipelines that streamlined cloud deployments.
- Secured inter-service communication to protect sensitive data in transit.
- Built automated integration and performance testing that caught regressions before release.

**Software Engineer, Al Mulla Group, Shuwaikh, Kuwait** — **Nov 2014 to Jul 2016**

- Developed enterprise web applications supporting internal workflows across multiple business units.
- Automated manual processes using a rules-based system to increase team efficiency.

**Software Development Engineer in Test, Cognizant Technology Solutions, Chennai, India** — **May 2012 to Oct 2013**

- Performed regression and progression testing of an internal web development tool across multiple release cycles.
- Created user manuals and video tutorials to support adoption and onboarding.
